

Plastic products for the Sign industry (SOFT SIGNAGE)

Due to the increase of large format printers for both PVC banners and textile frames, the demand for solutions for fixing printed cloths to aluminium frames has dramatically increased. Printed fabric cloth in aluminium frames is used for the construction of exhibition stands, for example, in stores as an eye-catcher, or as a Point-Of-Sales communication aid. Textile frames are also being increasingly used in museums, offices and interiors.

Flat PVC cord

The flat PVC cord is stitched onto printed textile cloths and ensures the canvas can be attached to the aluminium frame. The scope of application for textile frames is very wide, such as: LED frames, stand construction, retail and interiors. Roffelsen Plastics is the expert in the field of flat PVC cord and produces these in a wide variety of designs, sizes and elasticities.

- Material:** PVC and TPE
- Dimensions:** Many other dimensions are available in addition to the standard 14 x 3 mm.
- Surface:** Smooth or ribbed
- Colour:** T transparent blue, white or grey. Other colours are available on request.
- Packaging:** Standard package of 200 metres. On a roll, cardboard reel or plastic reel.
