

Javelin-Integra incorporates the unique design of the Javelin-Series 2 with a bench mounted baseplate to offer additional functionality.

The design of the Javelin Integra allows Keencut Technicians to factory adjust for straightness, using laser technology, to within 0.2mm over the 3.1 metre length of the cutter bar (1:15000). The accuracy of the Javelin-Integra makes it ideal for cutting banner materials, pop-ups and other display materials that require precise and accurate cutting for perfect alignment.

The Javelin-Integra features a mounted Javelin-Series 2 with integral Lift & Hold Levers on an Aluminium Base Plate. Javelin-Integra can be attached to an existing work table or a Keencut Proteus Bench to create a complete cutting station in your workshop.

Ideal for cutting PVC Foamboard, Vinyl, Woven Fabrics, Foam Centred Board, Honeycomb & Corrugated Plastics, Film, Paper, Tissue and many more flexible and rigid materials.

0.2MM GUARANTEED ACCURACY That's 1:15000 Guaranteed Cutting Straightness! **IDEAL FOR POP-UPS!**

Single Tool Cutting Head comes as standard with three unique Blade Holders to cut a wide variety of materials up to 13mm thick

Graphik, Medium Duty & Circular Blade Holders

Equipped with all new quick-fit blade holders so tools interchange quickly for maximum productivity

The new 45mm diameter rotary wheel improves performance & longevity

Shown here with the Medium Duty Blade Holder which includes blade depth guide for simple and quick adjustment

Blade locking thumb screw adds safety & convenience

Independent Roller Lift & Hold enables cutter to be lifted and suspended above work surface with ease.

Multiple integral full length grip cords hold work safely and securely while cutting

Additional Product Info

- ▶ Accepts both off-the-shelf and Keencut designed cutting blades
- ▶ Total dust free operation - safe to use near printers and plotters
- ▶ Reversible Graphik Blades make the JIT ideal for left-handed or right-handed operators
- ▶ Super grade anodising for lifetime good looks and function
- ▶ Integral extruded alloy cutting base adjustable for flatness and straightness
- ▶ Unique 4-section extrusion maintains close straightness even under flex
- ▶ Fully equipped and ready to work with blades included
- ▶ Mounts to most bench surfaces using the fixing screws provided
- ▶ Patented linear bearings tested under load for 1600km (1000 miles) and carry a 20 year replacement guarantee

Product Sizes & Codes

- ▶ JIT160 160CM - 64"
- ▶ JIT210 210CM - 84"
- ▶ JIT260 260CM - 104"
- ▶ JIT310 310CM - 124"
